HOW THE ROOM NUMBERS WORK

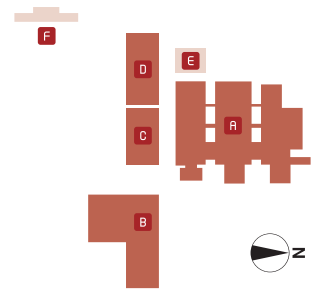

Each room number is structured using building, floor, North/South position, and East/West position details to associate the room with its location easily. It will become easier to find rooms if you memorize how these numbers are assigned.

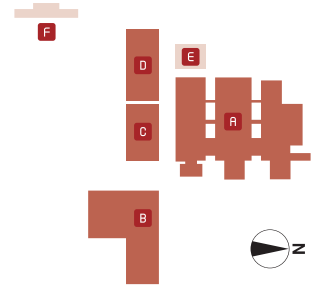

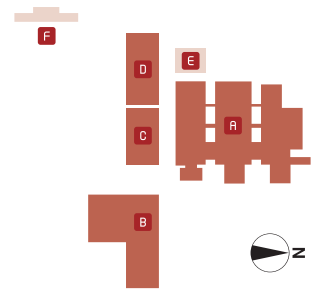

COLOR SCHEME (Zone Color Concept)

The North/South zones of Buildings A, C, and D are designated by the use of seasonal colors on each wall. The colors make it possible to visually understand your location on campus, while the design compliments the continuous change of the seasons.
