Purpose of studying Japanese language

Although the Community and Regional Policy Studies Major is an English-based major, in order to ensure that students studying in Japan experience a well-rounded student life and education and have a variety of career options, we recommend that students take Japanese courses proactively with the following goals in mind.

- 1) Acquire basic skills that allow one to engage in daily conversation.
- 2) Keep improving the skills into the future.

Although the minimum required number of credits for the Foreign Language courses is decided, students who wish to improve their Japanese language can continue taking Japanese classes beyond the minimum requirements until graduation. In the future, if a student chooses an occupation in Japan or one with a strong connection to Japan, a high level of Japanese ability will be desired. We urge you to take advantage of the Japanese curriculum at Ritsumeikan University.
