2023 Medical Examination For Biwako Kusatsu Campus

Be sure to take the annual medical examination for FY2023. If you are a working student and have had a workplace health checkup (including chest X-ray and taken in Japan) within a past year, you can replace this checkup by submitting a copy of the checkup to the Medical Service Center (first floor of the West Wing). In this case, you still need to answer the web questionnaires. If you have not had a Medical Examination for over 1 year, you must take one at this time. If you are scheduled to have a Medical Examination at your workplace in the near future, please consult us.

Please make sure to make a reservation. Please be punctual! As a special measure, if you are able to make an appointment this time, you will receive a free medical examination.

Subject: Students of nationalities designated by the University based on WHO information.

* If you have special permanent resident status If you have not been in the country designated by the university for more than 6 months the chest X-ray is not required and can be refused.

The main purpose of chest X-ray examination is to detect active tuberculosis (TB) that has developed to the point of infection or is at risk of developing into infectious disease, and to prevent mass infection on campus.

The chest X-ray exposure dose is 0.06 mSv, which is about 1/4 of the dose received when flying between Tokyo and New York.
