Department of Psychological and Brain Sciences, George Washington University, Washington DC (ジョージワシントン大学教授/立命館大学上席研究員)

2022年5月20日(金) 13:00~14:30

参加方法:オンライン

(お申込みいただいた方にZoom接続先をお知らせします)

申し込み方法:記載のQRコードからお申し込みください

申し込み期間:5月19日(木)まで ※講演は英語で行われます。

## **Summary**

The best minds have put together a global vision for human wellbeing and the wellbeing of the planet for 2030. These Sustainable Development Goals (SDG) from the United National are guiding countries and institutions, including Ritsumeikan University. Developmental psychologists can help think about the essential experiences for raising young people with the imaginations and commitments to effect these changes. Social psychologists can use knowledge of social influence and social relations to effect these changes. Ultimately, the SDG are human goals requiring significant individual and collective changes in behavior. Psychology is an essential building block for these changes.
